Ethan Caldwell

Senior Backend Engineer
Seattle, WA · ethan.caldwell@example.com · +1 555 010 4478 · github.com/ecaldwell-dev · linkedin.com/in/ethan-caldwell-eng

Summary

Backend engineer with 8+ years building high-throughput data services in Go and Python. I design event-driven systems on Kubernetes, care about observability and on-call health, and enjoy mentoring engineers who are new to distributed systems.

Experience

Senior Backend Engineer — Kestrel Analytics Inc.
Mar 2021 – Present

Seattle, WA

- Led migration of 40+ microservices from EC2 to Kubernetes (EKS), cutting infrastructure spend by 28% ($410K per year).
- Designed a PostgreSQL partitioning scheme that kept p99 query latency under 120 ms at 3x data growth.
- Built the Kafka-based ingestion pipeline processing 1.2B events per day for 300+ enterprise customers.
- Mentored a team of 5 engineers and introduced weekly architecture reviews.

Backend Engineer — Brightwater Logistics
Jun 2017 – Feb 2021

Portland, OR

- Rewrote the shipment-tracking API in Go, reducing average response time from 450 ms to 90 ms.
- Introduced contract testing across 12 services, lowering production incidents by 35%.
- Maintained CI/CD pipelines in GitHub Actions serving 60 engineers.

Projects

pgshard — Open-source PostgreSQL sharding proxy
2022 – 2023

github.com/ecaldwell-dev/pgshard

- Written in Go; 1.4k GitHub stars and 30 external contributors.
- Supports online resharding with zero downtime for tables up to 2 TB.

Trailhead — Route planner for hikers

- React Native app with offline maps used by 8,000 monthly users.

Education

B.S. Computer Science — University of Washington
2013 – 2017

GPA: 3.7/4.0

Skills

Programming: Go, Python, TypeScript, SQL
Infrastructure: Kubernetes, Terraform, AWS, Docker
Data: PostgreSQL, Kafka, Redis, ClickHouse

Certifications

Certified Kubernetes Administrator (CKA) — The Linux Foundation, Nov 2022

Languages

English (native) · Spanish (B1)
